

# Selling photovoltaic solar panels

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you get money from solar panels?

As a homeowner with solar panels, you may be able to receive payments for any excess solar energy you send back into the grid. Since 2019, the government have backed various schemes to help those who produce renewable energy, to benefit from sending their surplus into the national energy supply.

Are solar panels a good investment in the UK?

More than 1.3 million homes in the UK now have solar panel installations, the renewable technology making a contribution towards reducing carbon emissions and saving households hundreds each year, both through bills savings and Smart Export Guarantee payments from selling surplus electricity back to the grid.

Can you sell solar power in the UK?

This method of selling solar power was introduced by the UK Government in 2010 to promote the uptake of renewable energy. Homeowners and business owners who installed renewable technology could get paid for all the energy generated if they were registered with a provider under the scheme, whether used by them or not.
