

Is solar energy a good investment in China?

Solar energy is the most common, cheapest, and most mature renewable energy technology. With solar photovoltaics taking over recently, an in-depth look into their supply chain shows a surprising dependency on the Chinese market from the raw materials to the assembled PVs.

Do solar photovoltaics rely on the Chinese market?

With solar photovoltaics taking over recently, an in-depth look into their supply chain shows a surprising dependency on the Chinese market from the raw materials to the assembled PVs. This article tackles the main challenges in the solar energy market and sheds light on the opportunities in that industry.

Is China a leader in solar PV installation?

Regarding the installation, China is striving to lead that as well. The Renewable Energy Agency's updated report shows that solar PV installation increased from 72 GW in 2011 to more than 1 TW by the end of 2022 (IRENA, 2022b). China's share in production increased from 60 % in 2010 to almost 80 % in 2021.

Is China a good supplier of solar energy?

When it comes to supplying global demand, China is a favorable supplier; however, the main competitors are North America and Europe. It is noteworthy to mention that China made major investments in Malaysia and Vietnam, which made these countries major exporters of PV products as well (IEA, 2022a).

Who is Suntech Power?

Suntech Power has supplied or installed solar modules for numerous solar power plants and systems around the world. Notable installations include: The company's Suntech Energy Solutions division completed Google's 1.6 MW solar installation in June 2007.

Is Suntech a Chinese company?

Suntech Power Holdings Co., Ltd. (Chinese: 尚德; pinyin: Shàngdé) is a Chinese producer of solar panels, with 2,000 MW (2,700,000 hp) of annual production capacity by the end of 2011. It is headquartered in Wuxi, Jiangsu.
