

# Should the photovoltaic panels of the new house be removed

Do solar panels invalidate NHBC?

Installing solar panels on new builds in the UK doesn't automatically invalidate the National House Building Council (NHBC) warranty, provided the installation is carried out by a fully certified installer and doesn't compromise the structural integrity of the building.

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Are solar panels mandatory on new builds in the UK?

Solar panels aren't mandatory on new builds in the UK. However, other parts of the world have implemented requirements - in the EU, for example, solar panels will be mandatory on all new residential buildings by 2030.

Can solar panels be installed without a planning system?

Changes to permitted development rights rules will mean more homeowners and businesses will be able to install solar panels on their roofs without going through the planning system. Currently those who have to go through the planning system are having to wait over eight weeks and face extra costs.

Should solar panels be included in new buildings by 2025?

And a YouGov poll of 107 MPs in January 2024 revealed that 79% of them advocate for the inclusion of solar panels in all new constructions by 2025, signalling a push for further environmentally-friendly building regulations. In March 2024, the European Parliament approved a law requiring solar panels on all new residential buildings by 2030.
