We are mainly active in New Caledonia and Wallis and Futuna through our retail activities. We are also a major player in the renewable electricity generation sector. We lead several community outreach initiatives in these countries.

"The SunSPoT Tool is an interactive online tool that allows users to estimate the potential for electricity generation from PV on building roofs," explains Bruce. "The tool accounts for solar radiation and weather at the site, PV system area, tilt, orientation and shading from nearby buildings, and vegetation.
