What will Poland's solar market look like in 2022?

Poland was Europe's third-biggest solar market in 2022, with 4.9 GW installed. What can we expect this year? It will be different. Last year, around 80% of new PV installs came from the residential market segment. This year, there will be two factors limiting its growth.

What happened to the solar market in Poland?

If you look at our residential sales in Poland, 80% of it happened in the January-March period. In April, the market simply vanished. In May, activity started to pick up slowly. But by this point, people have already realized how net billing works, so this is no longer holding them back from installing solar as it did in the first place.

Why are investors reluctant to buy solar modules?

The significant price drop for solar modules driven by the falling polysilicon prices has created a strong expectation of decreasing price trends, so investors are reluctant to buy now and are waiting for further price declines. Meanwhile, there is a large gap in supply of large-scale inverters.
