

Press Release - The World Bank's Board of Executive Directors approved a \$35 million grant to enable solar power generation and increase access to electricity in Guinea-Bissau.

A 30 MW solar power plant will be developed near the capital, Bissau, to reduce electricity costs and diversify the energy mix. Battery storage will initially help stabilize the power supply and later offer additional services to the electricity system, according to the Ministry of the Economy, Planning, and Regional Integration of Guinea-Bissau.

Transforming Guinea-Bissau towards an inclusive, sustainable economy requires establishing an enabling environment for private investments and providing essential infrastructure and services, including electricity.
