The battery can store the extra energy produced from solar panels during the day to avoid using electricity at a more expensive rate. The peak time-of-use (TOU) rates can be double the price compared to off-peak rates. In such a scenario, a solar battery storage system can come in handy for using electricity without having to pay such a high price.

I feel like battery storage for home solar systems should be a no-brainer. Charge the batteries when the panels output more power than your home needs, and discharge the batteries when your home needs more power than the panels are outputting. &quot;Roughly 6% of residential solar systems installed in 2020 included battery storage.&quot; - cleanegroup

List of Azerbaijani solar panel installers - showing companies in Azerbaijan that undertake solar panel installation, including rooftop and standalone solar systems.

If you're having solar panels installed by us, you can add solar battery storage to your system for as little as ₼3,468. To make it more affordable, we offer flexible payment options, allowing you to ...

While solar battery storage is optional, it's a wise investment if you want to be able to store your solar panel's excess energy once the sun goes down. It's not a particularly expensive addition to a solar energy system and its inclusion can save you money in the long run and even give you the ability to sell excess energy back to the grid.
