Can solarsense retrofit Powerwall?

Solarsense are certified by Tesla to retrofit Powerwall to existing solar PV systems and integrate with new solar panels for homes and businesses. Contact us today for a free, no obligation quote. Sustainable energy day and night.

Can I Retrofit a solar battery to an existing solar panel system?

Yes, it's easy to retrofit a solar battery to an existing solar panel system. Depending on the specifications of your existing system and how much storage capacity you require, we offer four sizes of batteries.

How much does it cost to retrofit a solar battery?

Costs vary depending on the storage capacity of the battery you need - we can retrofit a solar battery to a storage system from £3,635. Where are solar batteries fitted? Technical advances mean solar batteries are now lighter and smaller, creating more options for home battery storage.

What is an AC-coupled solar retrofit?

An AC-coupled retrofit involves installing a separate inverter for your battery, allowing you to keep your existing solar inverter. Without the need to redesign or rewire your solar panel system, this option is typically more affordable upfront.

Should you retrofit a PV storage unit?

Sooner or later, almost every PV operator will consider retrofitting their system with a PV unit. Using more solar power yourself means higher returns because, by avoiding using an external energy supply, you save more than you would usually get when feeding into the grid. Why retrofit a PV storage unit?

How much does a battery retrofit cost?

How much does a retrofit battery installation cost? On average, the cost of installing a battery storage system is around \$9,000 after federal tax credits. However, the final price will vary based on the brand of battery and your location.
