

Solar support process

What is solar power & how does it work?

The sun provides an abundant source of clean, renewable energy. This can be converted into electricity using solar photovoltaic panels, known as 'solar PV', installed on your roof. This electricity can power your home, save you money, and help to decarbonise grid supplied electricity.

Why should you install solar panels?

Installing solar panels lets you use free, renewable, low carbon electricity. You can sell surplus electricity to the grid or store it for later use. According to low-carbon certification organisation MCS, there were more than 183,000 solar panel installations across the UK in 2023.

How do solar panels convert sunlight into electricity?

This can be converted into electricity using solar photovoltaic panels, known as 'solar PV', installed on your roof. This electricity can power your home, save you money, and help to decarbonise grid supplied electricity. Solar PV systems - a collection of solar panels - turn sunlight into electricity through the 'solar cells' they contain.

What is a DIY solar panel installation?

DIY installations allow you to customise your solar panel system to match your home's energy needs and roof layout (or perhaps even a balcony). Some professional installations may offer limited options, while a DIY approach allows for optimising panel placement, choosing specific components, and tailoring the system for maximum efficiency.

Should you start a DIY project with solar panels?

Beginning a DIY project with solar panels like EcoFlow Solar Panels marks a significant step towards securing renewable energy for your home. To install your own solar panel system, you must first understand such a project's legal and practical aspects.

What is a solar PV system?

Solar PV systems - a collection of solar panels - turn sunlight into electricity through the 'solar cells' they contain. These cells are made from thin layers of a 'semiconductor' material (traditionally silicon) between layers of glass.

As you know Project Solar UK Ltd want to provide you with the best possible information so you can maximise the benefits of your Solar PV installation. Below, you will see a list of monitoring ...

But the support provided by Blubase at the start of the project meant it all went well. The fitters were soon able to do everything themselves, and the assembly process went smoothly and was completed in time." ... simply ...
