

A transition to renewable energy is becoming increasingly more urgent in the High Arctic. In Svalbard (78°N), the previously coal based energy system is now, with a short transition period with diesel, moving to a completely renewable off-grid system. Both solar and wind energy are possible contributors to the energy mix.

We had an amazing time in Svalbard, thanks to Yngve and Gro. They are great hosts, attentive since the first message and through our whole stay. The warm and cozy apartment is close to the main street in Longyearbyen, very convenient and easy to walk to all the stores and beautiful points of interest around.

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy. The company has installed 360 solar panels ...

Svalbard and Jan Mayen, though remote, present a unique set of economic challenges and opportunities. As a consulting company, we [...]

IHS Nigeria, a subsidiary of the IHS Towers group, announced on Monday it has formed a strategic partnership with Jaza Energy to deploy solar power hubs at 250 towers in underserved communities across Nigeria.

A transition to renewable energy is becoming increasingly more urgent in the High Arctic. In Svalbard (78°N), the previously coal based energy system is now, with a short transition ...

In this study we show that snowdrifts pose a significant challenge for solar power plants in Polar climates as they can grow to cover the plant, resulting in reduced power production and an ...

EU Science Hub & DOPA & DOPA Explorer & Svalbard and Jan Mayen. Svalbard and Jan Mayen. 744. SJM. DOPA Explorer is the Joint Research Centre's web based information system on the world's protected areas, which helps the European Commission and other users to assess the state of and the pressure on protected areas at multiple scales. ...

The 1.8GW Benban solar park is among the world's largest. Image: Scatec. Singapore-headquartered manufacturer EliTe Solar has announced plans to build an 8GW cell and module manufacturing ...

In the remote Svalbard archipelago of Norway, situated in perpetual winter darkness, a groundbreaking project has been completed: the installation of the world's northernmost ground solar panels. This innovative initiative holds the potential to assist isolated Arctic communities in their transition to clean energy.

Dec 14, 2024 - Rent from people in Longyearbyen, Svalbard and Jan Mayen from \$20/night. Find unique places to stay with local hosts in 191 countries. Belong anywhere with Airbnb.

The project is BrightNight's first hybrid renewable energy project in Australia. It consists of a 360MW solar PV power plant and a 300MW co-located battery energy storage system (BESS ...

Leading US residential solar installer Sunrun has settled on adopting SolarEdge Technologies' "Energy Hub" inverter to enable greater integration of future smart energy devices for home energy ...

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy. The company has installed 360 solar panels along with a battery bank and thermal storage system at Isfjord Radio, an old shipping radio station.

As a global leader in solar technology, LONGi calls for global energy equity and has been driving the global energy transition in all aspects, reducing the costs for people on the path to carbon ...
