How much does a solar panel cost in the Philippines?

On average, the price of a solar panel in the Philippines is between PHP30,000 and PHP50,000 per installed kW, including installation and necessary equipment. To obtain an accurate estimate of the number of solar panels you need and the cost of your installation, it is strongly recommended that you request a quote from a solar panel company.

Where to buy cheap solar panels in the Philippines?

The cheapest offers of solar panels in the Philippines can usually be found in online stores or solar equipment distributors. There we can find opportunities for panels from lesser-known brands at promotional prices. However, when buying a very cheap panel, you should be careful about unfair offers and contraband.

What are the best solar panels in the Philippines?

Solar panels from trusted brands like Arduino, OEM Engineering, and ECO-WORTHY are some of the best solar-powered equipment in the Philippines, offered at reasonable prices. Monocrystalline and polycrystalline solar panels are sought after by many Filipinos for their efficiency rates and durability.

What factors affect solar panel installation cost in the Philippines?

Solar panel installation cost in the Philippines are influenced by various factors, such as the market situation, supply chain, manufacturer, and type of solar panel; they may be outdated and do not consider effects such as retail chain crises or inflation. Accordingly, the current provider prices may deviate from the above information.

How long do solar panels last in the Philippines?

Solar panels can pay for themselves in 5 years, and since each solar panel can last 25 years on average, it's considered better than a time deposit. The Philippines is known for its power failures or 'brown out' and sometimes the place is too remote to have electricity 'from the grid' at all.
