Search product ...*The Hoymiles MS-A2 micro storage unit is designed to make it much easier to connect a storage solution for balcony power stations. The manufacturer advertises that the solution can be connected to your own balcony power station in just 7 seconds and is ready for use.

How much energy can a hoymiles ms-a2 store?

With up to 2.24 kWh, the MS-A2 can also store a lot of energy and easily supply electrical devices with energy as a power bank in the event of a power outage or when traveling. The Hoymiles MS-A2 is therefore the perfect addition for anyone who operates a balcony power station and does not yet have a storage unit.

Does the hoymiles MS energy storage system work in parallel?

No problem, the Hoymiles MS energy storage system supports two units running in parallel. So you'll get 4.48 kWh of power altogether to get an energy boost for your home. You start saving straight away. You can use data from the Hoymiles S-Miles Cloud to maximize your savings, while the built-in battery gives you extra energy security.

How smart is the hoymiles MS?

The Hoymiles MS is smart enough to maximize the value of your energy harvest. You can set the most cost-efficient times for using or storing your solar power and avoid peak prices. Compatible with Shelly smart plugs and meters, the product keeps you on top of your load stats. The result? Zero waste, more yields and less energy bills!

How do I install a hoymiles balcony solar storage system?

HMS-W series keeps your solar running and the S-Miles Home app tracks your data day and night. It takes only a few seconds to install the Hoymiles balcony solar storage system. No worrying about complicated wiring at all! All you need do is unplug the microinverter and connect Hoymiles MS between the microinverter and the power. Simple as that.

How does hoymiles MS work?

Hoymiles MS also acts as a battery backup for your home as well as a portable power station that works on its own. The built-in 2.24 kWh battery lets you store excess energy and use it later. In a typical DC-coupled solution, the storage inverter has to match the DC power inflow from the PV modules with the MPPT algorithm of the microinverter.
