These plants are owned and operated by the state-owned utility company, Dominica Electricity Services Ltd (DOMLEC). In addition to hydropower, Dominica has been exploring other renewable energy sources, such as geothermal and solar power.

Storage power plant Dominica

Looking ahead, Ormat plans to expand its Bouillante power plant and, with the development in Dominica, will bring total generating capacity in the Caribbean to ...

To do so, a solar PV plant is intended to be commissioned, as well as a geothermal power plant. In anticipation of these future developments, which will have an impact on the management of its electricity grid, a Battery ...

Dominica is progressing with its first geothermal power project, with site preparation for the 10 MW plant underway. Construction is expected to begin by early 2025, ...

This project is designed to support the Commonwealth of Dominica in developing and integrating clean, sustainable and low-cost energy. Through this \$38.5 million project, a new robust transmission network will be built to withstand natural hazards, strengthening Dominica's electricity grid.

The \$50 million development in Dominica will support a 5-megawatt/2.5 megawatt-hours battery energy storage system that will aid the island's clean energy objectives.
