

Who is sunoyster Systems GmbH?

SunOyster Systems GmbH (SOS) is a start-up with 10 employees. SOS has its headquarters in Halstenbek near Hamburg and a production facility on the GreenTEC Campus in the North of Germany.

What is a sunoyster Solar System?

The SunOyster is a bi-axially tracking concentrating solar technology for the generation of power and heat. The SunOyster is a new concentrating solar technology which converts the direct sunlight into both heat and electricity from the same device, achieving efficiencies higher than anything else available in the market.

What is sunoyster technology?

SunOyster Systems developed a new highly efficient concentrated solar collector for the co-generation of power and heat. With the SunOyster Technology we combine the best of Concentrated Solar Power (CSP) and Concentrated Photovoltaics (CPV) and PV.

What is sunoyster concentrating solar technology?

The SunOyster is a bi-axially tracking concentrating solar technology for the generation of power and heat. The SunOyster is a new concentrating solar technology which converts the direct sunlight into both heat and electricity from the same device, achieving efficiencies higher than anything else available in the market.

Where is sunoyster made?

SOS has its headquarters in Halstenbek near Hamburg and a production facility on the GreenTEC Campus in the North of Germany. SOS has been developing the SunOyster technology since 2012 and has already invested around 10 million euros in funding, investor money and sales to make the required precision of the SunOyster sufficiently affordable.

SunOyster Systems. We are a company from Northern Germany, with headquarters in Halstenbek near Hamburg and production facility on the GreenTEC Campus in Nordfriesland. We have experience in developing and manufacturing solar trackers since 2013. Our constantly growing team is enthusiastic about advancing the electricity and heat revolution.

The SunOyster is a bi-axially tracking concentrating solar technology for the generation of power and heat. The SunOyster is a new concentrating solar technology which converts the direct...

SunOyster Systems develops the SunOyster, a new concentrating solar technology which is able to convert the energy of the sun into both heat and electricity from the same device, achieving efficiencies higher than anything else available in the market. For ...

The "SunOyster 16" (SO 16) is a patented concentrating solar collector with roughly 16 m² gross

mirror surface. It tracks the sun bi-axially to convert the energy of the sun into both electricity and heat (the SunOyster can convert 75 ...

SunOyster Systems. We are a company from Northern Germany, with headquarters in Halstenbek near Hamburg and production facility on the GreenTEC Campus in Nordfriesland. ...

SunOyster Systems GmbH (SOS) was - based on earlier preparatory developments going back to 2007 - founded in 2011 to develop the SunOyster Technology to serial maturity. In mid-2012, ...

The SunOyster has two different receivers. The patented hybrid receiver generates electricity and heat simultaneously. Aluminum tube with glass lenses and concentrator photovoltaic. ...

SunOyster Systems startete mit zwei Teams auf Tournee durch ganz Deutschland, um die aktuelle 70er Charge der zweiachsig nachgeführten PV-Trackern bei den Kunden zu installieren! Pro PVmover braucht es nur einen Tag für die Inbetriebnahme. Ein PVmover ist nach dem Baurecht der Bundesländer in der Regel auch auf dem Boden verfahrensfrei ...

Die SunOyster Systems GmbH (SOS) ist ein Start-up mit 7 Mitarbeitern.SOS hat den Sitz in Halstenbek bei Hamburg und eine Produktionsstätte auf dem GreenTEC Campus in Nordfriesland.SOS entwickelt seit 2012 die SunOyster-Technologie und hat bereits rund 10 Mio ro an Fördermitteln, Investorengeldern und ersten Umsätzen investiert, um die ...

The SunOyster is a new concentrating solar technology for the co-generation of power and heat - achieving high efficiencies from a small area. Up to 75% of the solar radiation can be turned into energy.

The "SunOyster 16" (SO 16) is a patented concentrating solar collector with roughly 16 m2 gross mirror surface. It tracks the sun bi-axially to convert the energy of the sun into both electricity and heat (the SunOyster can convert 75 % of the solar radiation), trying to represent the cheapest form of solar energy with the best surface efficiency.

Sunoyster systems New Zealand
