

What does Centrica Energy Storage do?

A key element of the infrastructure area of the Centrica family, Centrica Energy Storage operates the Easington onshore gas processing terminal in East Yorkshire and restarted gas storage operations at the Rough facility in the Southern North Sea in 2022, with a view to bolstering the UK's energy security and helping to reduce consumer bills.

What is Centrica Storage Limited?

The long term aim for Centrica Storage Limited is to turn Rough into the largest long duration energy storage facility in Europe, capable of storing both natural gas and hydrogen with the goal of bolstering the UK's energy security. Formerly Centrica Storage Limited (CSL), we have recently changed our name to signify a change in ambition.

Who is Centrica Energy?

Centrica Energy is a renewable energy trading company operating out of eight offices across all time zones to move energy from source to use. Our mission is to drive the green transition while offering sustainable and predictable energy costs for energy producers, suppliers and offtakers. In short, we call ourselves energy movers by nature.

What makes Centrica unique?

Centrica is unique among energy companies in the UK and Ireland, in its operating across the entire energy value chain through a variety of distinct, but complimentary businesses, all of which have a common purpose, the organisation says: "helping you live sustainably, simply, and affordably."

We operate the Rough gas storage facility in the Southern North Sea and the Easington onshore gas processing terminal in East Yorkshire, having restarted storage operations at Rough in 2022 to bolster the UK's energy security and ...

Centrica Energy Storage Limited operates as a gas storage facility. The Company stores natural gas for energy producers, energy users, traders, and suppliers.

To unlock the £2bn investment in the facility, Centrica requires a cap and floor model for the asset, similar to the model used for other forms of long-duration energy storage. A recent report from Centrica and FTI suggested that Rough could save consumers £1bn a year by 2050 if converted to hydrogen storage.
