

GreenPower has developed a range of projects from single on-shore wind turbines through to utility-scale assets as well as solar and hydroelectric schemes. GreenPower has the expertise and experience to manage all stages and aspects of high quality renewable energy project development and operation.

There are voluntary markets (often referred also as green power markets), which are driven by consumer preference, who can choose what type of electricity they want to buy from the grid.

Green Power International is a leading provider of power protection, power conditioning, and backup management power solutions. We help our clients reimagine, restructure and renew business functions to create agile and resilient organizations. Keenan Webber CEO.

GreenPower has achieved consent for over 260MW of clean renewable energy capacity and operates projects ranging from single wind turbine sites to utility scale commercial wind farms. GreenPower also has significant hydro experience having constructed their 500kW Carie hydro project near Pitlochry in Perthshire which they own and operate.
