Who owns Syria's natural gas?

The Syrian Gas Company (SGC)--which fell under the GPC--was the key entity in Syria's upstream natural gas operations, a position it inherited after being split off from the SPC in 2003. Syria's natural gas distribution network was managed by the SCOT.

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

What type of energy is used in Syria?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Syria: How much of the country's energy comes from nuclear power?

Does Syria have electricity?

Syria also had separate entities for the generation and distribution of electricity. Syria's oil sector has been in a state of disarray since 2011. Production and exports of crude oil have fallen to nearly zero, and the country is facing supply shortages of refined products.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

Is Syria a natural gas importer?

In 2008, Syria became a net importer of natural gas, but the country's current state of conflict--and sanctions--have affected the ability of Syria to receive natural gas. The only source of natural gas imports, the Arab Gas Pipeline, became the target of attacks as the conflict intensified, forcing the pipeline to shut down.

6 ???· ** Canada's Suncor Energy Inc suspended its Syria operations in 2011. Its primary asset is the Ebla development located in the Central Syrian Gas Basin covering more than ...

The conflict in Syria has imposed severe challenges on the country's energy sector, impacting daily life, livelihoods, the economy, and humanitarian aid operations.
