

Why should the Gambia invest in solar energy?

To match the rising demand and to provide sustainable and accessible energy to all Gambians, the potential for solar energy investment is immense in The Gambia. The government of The Gambia seeks to increase RE's contribution to 40% from 2% presently in the coming years.

How much solar power does Gambia have in 2022?

According to the International Renewable Energy Agency (IRENA), Gambia only had 2 MW of installed PV capacity at the end of 2022. Gambian utility Nawec recently started building a 23 MW solar project in Jambur, in Gambia's West Coast Region.

Will a new solar plant increase energy demand in the Gambia?

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will significantly increase Gambia's current generation capacity of 98 MW and enable electrification of rural areas. A strong commitment

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

Why is NAWEC launching a solar plant in the Gambia?

This marks the first time in the Gambia's history where a utility scale solar plant of 23 Megawatts Solar PV capacity and 8-Megawatt hours battery storage is being commissioned. This solar plant allows NAWEC to finally shift away from expensive heavy fuel oil-based generation which is costly and harmful to the environment.

Does the European Investment Bank support a new solar plan in Gambia?

Mr. Ambroise Fayolle, Vice-President at the European Investment Bank (EIB) "I am delighted that the European Investment Bank is supporting this new solar plan with such economic and social impact for populations in Gambia, particularly in rural areas.
