The many years of conflict in Yemen have caused the energy supply to collapse and the UN office was highly dependent on their diesel generator. In order to reduce their carbon footprint and have more silent hours, a pre-assembled containerized solar system with lithium battery storage was installed by GSOL and our local partner.

So far, we have conducted calculations to evaluate the solar photovoltaic (PV) potential in 7 locations across Yemen. This analysis provides insights into each city/location's potential for harnessing solar energy through PV installations.

The effect of dust accumulation and cleaning methods on PV panels' outcomes based on an experimental study of six locations in Northern Oman. ... the study concluded that the multi-crystalline panels have the best cleanliness factor. Hadwan and Alkholidi (2016) studied the impact of dust accumulation in the UAE on glass permeability and PV ...
