

The lights are installed on the solar panels

How does solar lighting work?

Solar lighting relies on photovoltaic cells, commonly known as solar panels, to convert sunlight into electricity. This electricity is then stored in batteries and used to power the light fixtures during the night. The key components of a solar lighting system include the solar panel, battery, controller, and LED lights.

How to install solar lights?

Before installing the solar lights, prepare the installation area. Clear any debris or obstacles that may hinder the installation process. Ensure that the ground is level and stable to provide a solid foundation for the light fixtures. Taking the time to prepare the area will ensure a smooth and secure installation.

Can I install solar panels in my garden?

Yes, you can install solar panels in your garden. Plus, as long as the system you install isn't more than nine square metres (m²), it won't require planning permission. Garden solar panels can refer to a variety of different solar panel setups, and not all of them require professional installation.

How much do solar-powered garden lights cost?

Solar-powered garden lights usually cost between £30 and £200. Large roof-mounted solar panels cost a lot of money, and not everyone has the finances or roof-space for them. Luckily, there are lots of different ways to use solar panels in your garden, and most aren't that expensive.

How to plan a solar lighting system?

Ensure that the chosen areas receive ample sunlight during the day to charge the solar panels effectively. Avoid shading from trees or nearby structures that can obstruct sunlight. Mapping out the installation locations will help you plan the layout and wiring of your solar lighting system.

Where should a solar powered floodlight be installed?

Ideally the solar panel should be installed south facing and in the sun for as much of the day as possible. This guide will take you through what you need to do to fit your solar powered floodlight safely and securely. Before you start, have a look at the best place to install your solar-powered light.
