

Tonga intelligent power home solution

As a part of its smart island goals, Tonga will soon generate more than half of its electricity by renewable means such as solar power. Using OpenWay Riva, Tonga can monitor and manage the integration of renewable energy into the electric grid, ensuring grid reliability and energy security.

The battery systems connect to the grid of Tonga Power, Tonga's sole electric utility, which announced the inauguration event today via a sponsored post in local news outlet ...

The battery systems connect to the grid of Tonga Power, Tonga's sole electric utility, which announced the inauguration event today via a sponsored post in local news outlet Matangi Tonga Online. Installation and commissioning work was carried out by contractor Akuo, which supplied containerised BESS solutions.

This collaboration seeks to address key challenges within the existing energy management system (EMS) and micro-grid systems (MGS), ensuring the efficient integration ...

Changing the existing electric meter with the new smart meter is part of Tonga Power's plan to improve electricity services to the electricity consumers and in general the people of Tonga. Smart Meters will allow TPL to offer alternative methods of billing such as prepayment.

This collaboration seeks to address key challenges within the existing energy management system (EMS) and micro-grid systems (MGS), ensuring the efficient integration of renewable energy sources such as wind and solar power into Tonga's power grid.
