

H2 Notos aims to produce green hydrogen using electrolyzers powered by large onshore wind and solar projects and supplied with desalinated sea water. The project aims to produce 200,000 tons of green hydrogen annually during its initial phase, with the potential to scale up production to one million tons per year in South Tunisia.

Download the Press Release (pdf - 155 KB) Paris, Doha, 18 October 2022 - The Al Kharsaah solar power plant developed by TotalEnergies and its partners ...

Our wide range of products and services help our business or retail customers optimize their transportation experience and operations. They can rely on our expertise every day through ...

By combining competitive hydrogen production in Tunisia and pipeline-based transportation, we can ensure a long-term supply at scale to support a sustainable transition of our customers to green...

Download the Press Release (PDF) Paris, December 15, 2023 - TotalEnergies and its partners are launching construction of a major hybrid renewables project in South ...

Green hydrogen will be produced using electrolyzers, powered by large onshore wind and solar projects, and supplied with desalinated sea water. The project aims to produce ...

In accordance with the provisions of the personal data protection regulation, TotalEnergies SE as data controller will process your data for the handling of your requests for information, ...

PRODUCTS. SOLAR PACKAGES; Hybrid Inverter; Solar Lighting; Solar Generator; Solar Fan; Solar Air Condition; ... 2700w Solar Power Energy Saver Kit without Battery \$ 599,000.00. 0 ...
