

Will Turkmenistan export gas to Europe?

More importantly, Turkmenistan seems intent on privileging its ties with Russia and Iran over any potential market opportunities in Europe. As a result, there is no sign of urgency from Turkmenistan to export any of its gas to Europe anytime soon. The Long Saga of Getting Turkmen Gas to Europe The idea of bringing gas from Turkmenistan is not new.

Does Turkmenistan need a Trans-Caspian Pipeline?

Turkmenistan has enough gas to somewhat offset the loss of Russian gas to the European Union, but Turkmen gas needs to reach the west side of the Caspian Sea first--and this has been the major problem. Russia and Iran have continually opposed the construction of the Trans-Caspian Pipeline.

Does Turkmenistan need a Southern Gas Corridor?

The European Union included Turkmenistan in its plans for a Southern Gas Corridor, part of which is already functioning, to transport gas from Azerbaijan's Shah Deniz II field in the Caspian Sea across Turkey to the Trans-Adriatic Pipeline that supplies gas to Greece, Albania, and Italy.

What are the current transit routes for Turkmen gas?

Current transit routes for Turkmen gas involve a three-way swap deal between Turkmenistan, Iran, and Azerbaijan, with possible expansion plans. Discussions intensify about the development of a new pipeline infrastructure across the Caspian Sea and through key transit nations, connecting Turkmenistan's massive gas reserves to Europe.

Could Turkmenistan replace Russian gas?

But with gas reserves estimated at between 10 and 14 trillion cubic metres, the main focus of interest in Turkmenistan remains its potential to replace the Russian gas that has all but stopped flowing to Europe since Russia's invasion of Ukraine.

Could Turkmenistan be a natural gas supplier?

Moscow has retaliated by restricting gas flows to Europe and even shutting down the crucial Nord Stream 1 pipeline, sending energy prices soaring. The European Union is now desperately searching for new sources of natural gas. Turkmenistan, with the world's fourth largest gas reserves, would seem to be a possible supplier.

In late July 2023, Turkmenistan made waves by announcing it was ready to fundamentally redraw the map of natural gas infrastructure linking Central Asia and the South Caucasus with Turkey and onward to Europe. But whether it ...
