

How is energy used in Uruguay?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

How much electricity does Uruguay produce?

In 2020, Uruguay produced 13.5 TWh of electricity, with 40% coming from wind energy, 30% from hydro, 20% from biomass, 6% from fossil fuels, and 4% from solar. As of 2020, 100% of the population has access to electricity. The UTE is spending \$960 million between 2020-2025 for installing new electrical transmission infrastructure.

How much electricity does Uruguay generate from wind & solar?

Uruguay generates nearly half of its electricity from wind and solar, more than any other country in Latin America and the Caribbean. Source: Visual Capitalist: Solar & Wind Power by Country &#169; 2020 The World Bank, Source: Global Solar Atlas 2.0, Solar resource data: Solargis.

What percentage of Uruguay's electricity is renewable?

As of 2020, renewables accounted for 75.8% of Uruguay's electrical capacity, while non-renewable sources made up the remaining 24.2% (down from 29% in 2016).

Is Uruguay a petroleum importing country?

Uruguay is a petroleum - importing country, and most of the industry is controlled by the state owned industry ANCAP. ANCAP operates both the only refinery in Uruguay, La Teja Refinery and the distribution of gas within the country.

Why did Uruguay reopen the Nuclear Debate?

The energy crisis in Uruguay in 2007 led to Uruguay reopening the nuclear debate under the presidency of Tabar&#233; V&#225;zquez, when the Executive Branch established a multiparty committee devoted to the study of the use of nuclear energy to generate electricity and the installation of a nuclear power plant.
