Will Uzbekistan fund a 250-megawatt solar photovoltaic plant?

TASHKENT, May 21, 2024 -- The World Bank Group, Abu Dhabi Future Energy Company PJSC (Masdar), and the Government of Uzbekistan have signed a financial package to fund a 250-megawatt (MW) solar photovoltaic plant with a 63-MW battery energy storage system (BESS).

Will Uzbekistan develop a solar power plant?

Uzbekistan will be the first country in Central Asia to develop and produce solar energy by Uzbekenergo, a state-owned energy company. The Samarkand region was picked along with six other regions being inspected. The solar power plant is to have a capacity of 100 megawatts.

How does Uzbekistan produce electricity?

Electricity production is a critical aspect of Uzbekistan's energy landscape. The country primarily relies on thermal power plants that convert heat from burning fuels or nuclear reactions into electricity, although this process can be inefficient, with up to fifty percent of the energy content lost.

How much energy does Uzbekistan use?

Uzbekistan had a total primary energy supply (TPES) of 48.28 Mtoe in 2012. Electricity consumption was 47.80 TWh. The majority of primary energy came from fossil fuels, with natural gas, coal, and oil the main sources. Hydroelectricity, the only significant renewable source in the country, accounted for about 2% of the primary energy supply.

Why is natural gas important in Uzbekistan?

As of 2021, natural gas stands out as the predominant source of electricity generation in Uzbekistan, contributing to 88% of the overall electricity output. This significant dependency on natural gas underscores its vital role in the nation's energy strategy.

Who oversees the energy sector in Uzbekistan?

In Uzbekistan, the governance of the energy sector is overseen by key governmental bodies, primarily the Ministry of Energy, which was established in February 2019. This ministry is responsible for the implementation of state policies, regulations, and decrees across various energy subsectors including electricity, natural gas, and oil.

Energy storage platform provider Powin and Portugal's Galp have partnered to install a utility-scale BESS at one of Galp's solar power plants near Alcoutim, in the Algarve, ...

Many people may not realize that the 2024 Super Bowl was powered by 100% renewable energy this year and Powin's team helped make that happen. We teamed up with EDF Renewables to achieve a ...
