

Vatican City hybrid wind solar

Will a Vatican solar project be built outside Rome?

In an apostolic letter, the pontiff said the project will be constructed on Vatican-owned property outside of Rome that spans 424 hectares, adding capacity to existing solar panel installations in the city state.

How much solar energy does the Vatican produce a year?

Thanks to a unique photovoltaic plant installed on the roof of the Vatican Audience Hall, the Papal State has been producing 300 MWh of solar energy every year since its installation in 2008. The project was planned and managed by BayWa r.e. with the PV modules, inverters and its installation donated by solar technology provider, SolarWorld.

How can the Vatican save CO₂?

In the heart of the Vatican, we converted 2,134m² of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO₂ each year.

Is Vatican City the greenest state in the world?

Vatican City may be the smallest sovereign state in the world, but it is also one of the greenest. It has long been an exemplar for tackling climate change through its approach to renewable energy.

What does Pope Francis say about climate neutrality?

"We need to make a transition towards a sustainable development model that reduces greenhouse gas emissions into the atmosphere, setting the objective of climate neutrality," Pope Francis wrote in the letter, titled *Fratello Sole*, or Brother Sun.

Pope Francis has unveiled plans for a solar plant that will see the Vatican City generating all its electricity from renewable sources.

Pope Francis has unveiled plans for a solar plant that will let the Vatican City generate all its electricity from renewable sources. With an area of 121 acres or 0.44km² and a population of around 825, the Vatican City in Rome is the smallest independent state in the world by both area and population.

In the heart of the Vatican, we converted 2,134m² of idle roof space into a source of green renewable energy. The energy produced by this plant is directly fed into the Vatican's grid, helping to save around 225 tons of CO₂ each year.

The Vatican is set to join an elite group of nations generating all their electricity from renewable sources, following Pope Francis's announcement of a new solar power project. This initiative positions Vatican City as the eighth country worldwide to achieve this milestone.

Vatican City hybrid wind solar

Solar energy is gaining traction everywhere, including at the Vatican. In an apostolic letter, Pope Francis announced that Vatican City will soon be powered by solar panels. The letter that was titled "Brother Sun," reported Euronews, was dated June 21, 2024 on the summer solstice which is the longest day of the year. The apostolic letter ...
