The relationships we have built with producers and refiners enables us to source the highest quality grades, blended and tested by our experts to deliver the products you require.

How does Palau manage energy efficiency?

Palau initiated energy efficiency efforts to reduce government energy use through its Energy Conservation Strategy in 2007.

How much hydrogen does Palau produce a year?

Namely, the hydrogen tank, an electrolyser and a fuel cell. The hydrogen tank was optimised at 25 000 kilogrammes (kg), the electrolyser at 25 MW and the fuel cell at 50 MW. In this scenario, one thing to note is that green hydrogen production significantly increases Palau's total load, to approximately 120 GWh/year.

Does Palau have a national energy policy?

The Republic of Palau endorsed its National Energy Policy (NEP) in 2010. An Energy Sector Strategic Action Plan formed a guiding document for implementation of this policy.

How much gas does a boat use in Palau?

They represent one of Palau's key tourist attractions, with numerous visitors travelling every year for diving and snorkelling. According to information provided by PEA, an average 38 foot open boat with a 250 horsepower twin engine consumes approximately 40 gallons of gasoline when travelling back and forth to the Rock Islands.

Experimentation with renewable energy in Palau started as early as the 1980s with solar, wind, and biomass technologies. While wind and biomass were found to be infeasible in early years, solar installations have increased their share in the energy mix. It is estimated that Palau can expand its photovol-
