

## Wallis and Futuna datasafe battery

The DataSafe &#174; DX/DXC range of batteries are designed for use in large data centers which demand the highest levels of security. Engineered with multi-cell calcium flat plate design, DataSafe DX/DXC batteries deliver cost-effective performance.

DataSafe®; HX Batteries. Featuring Valve Regulated Lead Acid (VRLA) technology, DataSafe®; HX batteries offer superior solutions for a range of Uninterruptible Power Supply (UPS) and IT ...

DataSafe®; HX Batteries. Featuring Valve Regulated Lead Acid (VRLA) technology, DataSafe®; HX batteries offer superior solutions for a range of Uninterruptible Power Supply (UPS) and IT applications. The batteries combine several select design features to maximize reliability and service life while ensuring high power, low maintenance performance.

DataSafe® XE batteries are supplied in a charged condition and are capable of extremely high short circuit currents. Take care to avoid short-circuiting terminals of opposite polarity. ...

DataSafe XE batteries are the first specifically designed to meet the evolving needs of today's data center requirements. Engineered with the most advanced Thin Plate Pure Lead (TPPL) technology and superior

DataSafe XE batteries are the first specifically designed to meet the evolving needs of today's data center requirements. Engineered with the most advanced Thin Plate Pure Lead (TPPL) ...

The DataSafe CX-M battery features the Slide-Lock post seal design. The DataSafe CX-M battery was designed for easier maintenance since all the posts and connectors reside above the cell cover; maintenance routines, including individual cell monitoring and intercell resistance measurements are simplified.

The HUP battery ensures you receive more runs per shift, a higher capacity for sustained performance during each shift and less maintenance downtime. HUP battery plates significantly reduce flaking and shedding of positive plate materials.
