Can a wind turbine work in a typhoon?

MingYang Smart Energy, the Chinese manufacturer of offshore wind turbines, has unveiled its latest turbine prototype that can work even in severe typhoons. At 18MW, this is also the world's largest turbine to date. With the world agreeing to phase out fossil fuels, solar and wind energy plants will now take center stage in meeting power demands.

Can an offshore wind turbine withstand typhoon-force winds?

Standard offshore wind turbines cannot withstand typhoon-force winds. However, the V117-4.2 typhoon-resistant turbine, originally developed by Vestas Wind Systems and optimized by MHI Vestas Offshore Wind, is designed to withstand wind speeds of 57 meters per second (m/s) and even higher gusts.

What is a typhoon-resistant wind turbine?

The V117-4.2 wind turbine, originally developed by Vestas Wind Systems and optimized by MHI Vestas Offshore Wind, is typhoon-resistant, capable of withstanding wind speeds of 57 meters per second (m/s) and even higher gusts. When wind speeds exceed 30m/s, the system stops generating power.

How does a typhoon wind turbine work?

When typhoon winds - classified as in excess of 119km/h (around 33m/s) - occur, the turbine's blades are pitched into the wind enough to keep them spinning at a much reduced rate, to avoid damage while still generating sufficient power to keep essential safety systems operational.

How fast can a wind turbine withstand a typhoon?

Details of what this technology involves have not been revealed, but this would mean that the turbine can withstand winds of 183 - 200 feet (56-61 m) per second, the most severe of typhoons the world has seen. While that is mighty impressive, the tag of the world's largest turbine is unlikely to last for long.

Can wind turbines withstand typhoon Haiyan?

Japanese engineers are hoping to build wind turbines that can withstand the world's worst typhoons, generating power even in the midst of a natural disaster. Mariel Robedizo Engranes was 15 when Typhoon Haiyan hit. She was living in her hometown of Dolores, Eastern Samar, in eastern Philippines.
