This study concludes that a fully sustainable energy system for Åland can be achieved by 2030. Expanded roles of solar PV and wind power generation capacities through domestic investment can effectively replace reliance on imported energy carriers, promote sustainable growth, and eliminate the need for fossil fuels in the energy system.

Double Impact: Offer both solar solutions and EV charging, meeting two essential needs in today"s world. Growing Demand: With the rise in electric vehicles and eco-conscious consumers, the demand is skyrocketing.

Man vill ta reda på hur Åland kan maximera det ekonomiska värdet av vindkraften till havs och rapporten för fram tre olika modeller. De är att ansluta elen till enbart Finland eller Sverige, båda länder, eller att använda elen till att framställa vätgas på Åland.
